NEW GENERATION

Kentruck

Swan

SH-SHV 2000
 SH-SHQ 2500

The new generation
 of pallet trucks.

- Robust
- Strong
- Highly manoeuvrable

For long and heavy loads in limited space, there's only one choice! The new Swan pallet truck

With the largest steering angle available on the market, the Swan provides superior handling in confined spaces.

The Swan is the only pallet truck for handling and transporting long goods.

The new Swan has premium quality hard-chromium-plated pump and lift pistons with purpose-designed seals for heavy handling in both hot and cold temperatures. The Quick-Lift version lifts pallets clear of the floor with a single pump action.

Newly designed forks with a special sliding rail have replaced the traditional jack system ensuring smoother pallet entry.

A selection of alternative wheels are available for varying floor surfaces.

The exceptional 300° steering angle ensures excellent handling in confined spaces – especially inside vehicles and on loading ramps.

The Swan's unique design enables long loads to extend beyond the pump unit – making it ideal for exceptionally long loads.

The Swan is available in a version with a electronic scale. The SHV 2000 lifts, weights and transports in a single operation

- 4 load cells
- Microprocessor controlled
- Tara over the whole measuring range 0-1500 kg
- Accuracy: 0-600 kg/200g
601-1000 kg/500g
1001-1500 kg/1000g
- Indikator, easy to read
- Automatic shut down
- Rechargeable battery and charger included

Pallet truck Swan by *Kentruck*

Sliding extension forks for fast and simple extension.
